

Simple & Affordable Compliance

FHA *Software* has been successfully automating the affordable housing management industry since 1985 with over 5,500 RD/HUD/LIHTC projects currently relying on FHA *Software* for their monthly forms compliance, nationwide.

Below are several reasons why smart managers continue to use and recommend FHA *Software* ...

- ✓ **Site or Web-based Installation ... It's your choice !** - Your affordable housing management software program does not have to be run from an internet website. If remote access is not an issue or desired, *your* software and *your* project database should be running in *your* computer, not someone else's. FHA *Software* can be installed in and run from any site office or web-based computer system.
- ✓ **Most all competitor software databases can be imported (FREE)** - FHA *Software* has a built-in ability to automatically import existing tenant information from most all HUD/TRACS or RD/MINC or LIHTC compliant competitor software programs. This eliminates the need to reenter tenant related data and speeds up the time it takes to start using FHA *Software*.
- ✓ **Other software add-ons are features included in FHA Software** - Other software vendors charge extra for features like Waiting List, On-Screen RD & HUD Management Handbook References, Section 8 Special Claims Processing, Recertification Notice Processing, Custom Report Editing, Work Orders, Unit Inventory, etc.. Standard FHA *Software* packages include these features and much, much more.
- ✓ **Prompt, courteous, same day, unlimited, toll-free support** - While other software vendors restrict technical support time and take days (sometimes weeks) to return your call, FHA *Software* users enjoy unlimited, same day access to experienced support staff.
- ✓ **FHA Software is reasonably priced** - Purchase price & annual maintenance fees are based on the number of units you manage and networking requirements. Additional price breaks, such as Extended Use Licenses, Quantity Purchase & Small Package Discounts, are also available. Switching to FHA *Software* may actually cost less than the renewal fee of your existing software contract. Basic FHA *Software* annual maintenance fees average \$199 to \$599 with no contracts !
